Please find below and/or attached an Office communication concerning this application or proceeding.

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to remote control method and system, classified in class 455, subclass 420.
- II. Claim 5, drawn to server for remote control, classified in class 709, subclass 217.
- III. Claim 6, drawn to data processing device, classified in class 700, subclass 65.
- IV. Claims 7-8, drawn to computer storage, classified in class 360, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as remote control system. Invention II has separate utility such as computer server. Invention III has separate utility such as information processing device. Invention IV has separate utility such as data storage. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2683

4. A telephone call was made to Michael Whitham on 12-08-2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
